

Email and Exchange

Allow email account to send as different email account

Need to send email from a different email address (Send as)

1. Log into control panel <http://cp.outlookinthecloud.com:9001/>
2. Click on the email address you want to send from
3. Click on the permissions tab
4. In the send as section add the email address that requires permission
5. Click Save
6. This will take 5-10 minutes to updated the system
7. Use outlook to send test email from the new account
