How to Setup Office 365 email on iOS 8+ using Outlook mail client from App Store

Set up Office 365 account in Outlook for iOS

If you have an Office 365 for Business or school account, you can set up a @yourdomain.onmicrosoft.com, @yourdomain.com, or @schoolname.edu email on Outlook for iOS.

1. Open Outlook for iOS.

2. Tap Settings > Add Account > Add Email Account.

3. On the Add Email Account page, type your full email address. For example, yourname@contoso.com, and then tap Add Account.

4. Enter your password and tap Sign In. Outlook may request access to some of your email features. If prompted, agree to these permissions.

SMTP Type	URL	Port	SSL
Incoming Mail (IMAP) Server:	outlook.office365.com	993	Yes
Incoming Mail (POP) Server:	outlook.office365.com	995	Yes
Outgoing Mail (SMTP) Server:	smtp.office365.com	587	Yes
